

First Loops

Type each block of code, and press Run to hear how it sounds.

```
use_bpm 105

live_loop :drums do
  sample :drum_bass_hard
  sleep 0.5
  sample :drum_cymbal_closed
  sleep 0.5
end
```

Change your code, don't press Stop, just press Run again...

```
use_bpm 105

live_loop :drums do
  sample :drum_bass_hard
  sleep 0.5
  sample :drum_cymbal_closed
  sleep 0.25
  sample :drum_cymbal_closed, amp: 0.5
  sleep 0.25
end
```

Now try splitting the sleep 0.5 in half and adding another sample between the two new sleeps, for example:

```
use_bpm 105

live_loop :drums do
  sample :drum_bass_hard
  sleep 0.25
  sample :drum_cowbell, amp: 0.3
  sleep 0.25
  sample :drum_cymbal_closed
  sleep 0.25
  sample :drum_cymbal_pedal, amp: 0.5
  sleep 0.25
end
```

Does that sound awful to you? It does to me. Try another sample.
